CHAIRS STOOLS

A sinuous sled base chair. The 1-1/4 inch steel tube frame, finished in epoxy or chrome, features die cast domed end caps and black plastic arm rests. Seats are of moulded foam with rigid urethane inner-shell and zippered slipcovers, or of lacquered birch veneer plywood.

Sylvester is also available in an armless version, and as a high stool of generous proportions. Alone or as a complement to the Tom line, Sylvester is ideal for health care and food service duty.
