LOUNGE SEATING

Settees, sofas and single link chairs from the Brava and Zeubra lines are joined to provide high density seating by the yard. Tables punctuate seating rows, and are used to connect lines of seating in L, T and X shapes.

Seats feature zippered slip-covers over moulded foam and steel tube inner frames, with exceptional support from a tubular steel structure which spans between arms. Arm frames and skids available in epoxy or chrome finished steel tubing, or in clear lacquered oak.
