TABLES

Group Four's X and T bases are ideal for many settings, providing support for a wide range of table top sizes. The 6500/ 6600 Tubular X & T bases feature all welded construction with either flat or domed end caps. The 6500 T base is also available as a folding table, in single or double column versions.

A more sophisticated appearance is offered by the 6300/ 6400 Half Round X & T bases. One-piece construction is standard; alternately the column and foot can be supplied knock-down. The 6700/ 6800 Flat Foot X & T bases use a slim, 3/4 inch thick foot with separate column, for an elegant look well suited to meeting and conference rooms. Column and foot can be supplied in matching or contrasting finishes.

For increased stability under large table tops, double columns are available on the 6500 Tubular and 6300 Half Round T bases, and quad columns are available on the 6400 Half Round and 6800 Flat Foot X bases. Table accessories include casters, self-levelling glides, flip top mechanisms, and crank height adjustment. Modesty panels, keyboard trays, CPU holders, linking devices and wire management features can also be added.

Group Four table top surfaces are plastic laminate or wood veneer on 1 inch particle board. Edge treatments include laminate self-edge; flat and bullnose PVC edges in colours to match epoxies; flat and bullnose hardwood edging; and a variety of profiles in SoftEdge, an integrally moulded, semi-soft elastomeric urethane. Clear laquer finish is standard for wood and veneer; custom stains are available.
